Introduction

University of Bologna was founded in 1088, UNIBO is considered the oldest university in the Western World. UNIBO boasts over 86000 students enrolled, 33 departments, 11 schools, 5 campuses, and nearly 6000 employed as instructors or support staff. UNIBO offers 43 international degree programs, 21 of which are delivered in English; 51 PhD programs, 47 specialization schools, and 64 Master's programs. This heterogeneous nature diversified structure and investment in the professionalization of support services ensures solid institutional support for the research team. The

post-doc position will be hosted by the Department of Management, which currently employs 30 full, 35 associate, and 23 assistant professors, and 23 PhD students. DiSA coordinates several undergraduate, Master's programs, and oversees the activities of Bologna Business School, the business school of the University of Bologna. Additionally, since 1992, DiSA offers a PhD program in Management. DiSA's core subjects are Accounting, Finance, Innovation & Entrepreneurship, Marketing, Organization, and Strategy.

More information about the Department of Management

The Department of Management at the University of Bologna provides a dynamic research environment in which faculty members and distinguished visitors conduct both applied and theoretical research in several areas: Entrepreneurship, Technological Innovation, Management, Financial Markets and Institutions, Business Finance, Marketing, Organization, Strategy.

The Department of Management stands in leading positions in international rankings, and it extensively publishes in major journals: Academy of Management Journal, Administrative Science Quarterly, Entrepreneurship: Theory & Practice, Journal of Banking and Finance, Journal of Corporate Finance, Journal of Business Venturing, Organization Science, Regional Studies, Research Policy, Strategic Management Journal, Strategic Entrepreneurship Journal. The department of Management ranks first among the Italian departments in the area of Economics, Management and Statistics (according to the 2017 "Dipartimenti di Eccellenza")

Project Description

The Research Fellow will be involved in the execution of research activities within the project entitled "The determinants of academic mobility and its impact on knowledge transfer: The experience of the Italian context in a multi-level logic".

The mobility of academics is considered a fundamental lever for the production of scientific knowledge. Starting from data on a large sample of individuals, the project aims to map the mobility of the Italian academic context, identifying the antecedents, understanding their impact and proposing implications for the individual, for the single disciplines and Universities and for the entire academic system. This information will be integrated with data on the population of academics in Italy, originating a unique database that will allow an all-encompassing analysis of the phenomenon. Moreover, given the complexity of the information processed, the project will combine typical social science approaches with semantic publishing techniques typical of computer engineering.
