National Chi Nan University School of Management, Information Management Department
Full-Time Faculty Recruitment Announcement

A Tranquil Environment with Convenient Transportation

National Chi Nan University is located in Puli Township, Nantou County, the geographic center of Taiwan. It is the only national university in Nantou County. The university is adjacent to one of Taiwan's most attractive tourist locations, Sun Moon Lake National Scenic Area. Surrounded by mountains, the university has a quiet and pleasant atmosphere; the spacious campus and eye-catching views make the school itself a scenic area. There are single-room and family-oriented dormitories available for faculty. There is also a first-rated sport and health center, including a gym with extensive fitness facilities, a competition-sized heated swimming pool, and a high-end SPA facility. For the dining options, the university has multiple restaurants and convenience stores. Puli township is only a ten-minute bus ride from campus, making daily living essentials easy and convenient. Living on campus is like dwelling in a beautiful and secluded setting,allowing people to concentrate on advanced studies and fully stimulating research inspiration. All in all, it forms a perfect balance for physical and mental well-being.

Travel from Taichung High Speed Railway Station to National Chi Nan University by bus takes only 40 minutes. Several round-trip passenger trips are scheduled daily, and there's even a trip scheduled to arrive at the campus at 8:30 a.m., ideal for faculty, staff and students to commute.

Department Features

1. The Information Management Department has 13 full-time teachers with doctoral degrees from home and abroad. Their expertise is evenly distributed among three domains: Information Management, Information Science & Engineering, and Management. Department faculty are responsible, devoted and concentrate on their expertise, and they have accumulated abundant academic industrial experience over the years. They have formed a harmonious and studious atmosphere for outstanding partnership potential for developing one's academic goals and industrial experience.
2. The department is affiliated to the School of Management, with curriculum focused on two

sub-fields: "Information Management & Decision Science" and "Information Technology & System Development." The department aims to cultivate students with cross-domain π-type talents and equip them with the abilities of theory acquisition, technology application and evidence demonstration. Secondly, we guide our students to develop global views and local perspectives.

3. The department fully respects teacher expertise. In addition to mandatory courses, teachers have the autonomy to open classes which optimize their own expertise and enrich their students' learning experience.

4. Students and faculty form close bonds. During the duration of their studies, students follow teacher guidance to do research, often resulting in quality job offers and maintaining deep friendships post-graduation. The department has been rated as "excellent" according to survey data from the Taiwan Ministry of Education, showing a 90% employment rate for undergraduate alumni after 5 years of acquiring their degree, with salaries 28.2% higher than the national average.

5. Many teachers in the department have won Excellent Mentor awards. They are devoted to nurturing their students both academically and intellectually. Positive mutual relationships exist between the teachers and students in all areas of interaction.

6. Additional information about the department can be found at
   https://www.im.ncnu.edu.tw/en/en-aims-and-objectives/

Faculty Resource Support

1. Each teacher has a personal study room between 107 – 178 square feet.

2. Teachers set up their laboratories based on their own expertise, and provide guidance to undergraduate and graduate students on fully utilizing the laboratories.

3. The average teaching times are about ten to eleven credits hours per semester for each teacher (including lecturing, instructing students, carrying out administrative duties, executing research plans, etc.). Each individual teacher is responsible for recruiting 19 graduate students annually, and participating in ten theme-based seminars per school year. All faculty members will share responsibilities in supervising graduate and undergraduate students. The department provides a balance between teaching tasks and research development.

4. Department faculty form their own teaching and research support groups in order to exchange various beneficial experiences. There are also many cross-domain supporting groups for teachers on campus. The university is dedicated to giving teachers ample opportunities to exchange their expertise.

5. The department fully supports teachers' multi-professional development. The university has set up various promotion channels and relevant incentives to encourage faculty advancement in both teaching and researching performance. Three of our outstanding faculty members were listed in The World's Top 2% of Scientists in the 2020 Stanford University Scopus Paper Impact Analysis. Many teachers also play invaluable roles in various academic and educational activities, including acting as the convener for Taiwan's Ministry of Science and Technology, the co-host of the University Social Responsibility Program of Taiwan's Ministry of Education, and editorial board members of important journals in Taiwan and abroad.
